INTERNSHIPS

Oasis Infotech | May 2023 - June 2023

- During my internship, I had the opportunity to delve into the dynamic world of marketing at Oasis Infotech Company, Immersed in a fast-paced environment.
During my web development internship, I embarked on an immersive journey into the realm of front-end technologies at Oasis Infotech Solutions. Working alongside seasoned developers, I played a pivotal role in building responsive and user-friendly web applications. From designing sleek user interfaces using HTML, CSS, and JavaScript to implementing robust functionality helped in enriching my overall experience in this domain.

PROJECTS

College management system | August 2023 - October 2023

- Created a website for college management by developing a user friendly interface using HTML, CSS, javascript. It aims to solve any issues faced by the students by directly posting in the website. The issues will be shown to the concerned coordinator only and it also maintains the details of the student confidential. I have also used a backend API which helps to get the issue posted by the student directly to the concerned coordinator email. It helps to deal with the issues like attendance , ragging, exams,etc.

ACHIEVEMENTS

- Top 10 in class, Received scholarship in B.Tech/B.E.
- Received scholarship in school
